GSA Steam Service Specifications

[Note: The following specifications assumes a single delivery point at the Government facility for which is required. If more than one delivery point is desired, this specification should be modified to include requirements for each delivery point.]

(a) The Contractor shall provide to the Government facility at [Enter name and location of specific premises to be served], steam service in a manner and form that is consistent with (1) all applicable laws, rules, regulations, codes, permits, and industry standards for the type of service provided, and (2) the facility s service requirements. Estimated annual service requirements are: Maximum hourly demand	roquir	ements for each delivery point.				
[**Note: If metric units of measure are acceptable to the governing regulatory body, entries should be in metric units. Otherwise, entries should be in regulatory body approved units of measure. A table for conversion of commonly used English units to metric units is attached to this specification.] [If changes in annual requirements during the contract term are foreseeable, the above description of annual usage should be modified to indicate the expected changes.] Estimated consumption on a monthly basis for a typical year is shown in Attachment A of Section J. The usage amounts shown in this paragraph are estimates only and do not constitute a Government usage guarantee. The Contractor shall have** KJ (lbs.) per hour of steam continuously available at the Government facility at the pressure of not less than** hor more than** KPa (not less than nor more than** kPa (not less than nor more than** hor more than*** hor more than** hor more t	<i>premi</i> rules,	ses to be served], steam service i regulations, codes, permits, and i	n a manner and f ndustry standard	orm that is cons s for the type of	sistent with (1) all service provided	applicable laws,
